COVID-19 Contact Tracing

After receiving notice of a confirmed positive case of COVID-19 in the Grove Street Academy school community, school administration will begin working in concert with the Ulster County Department of Health to begin the contact tracing process.

School administration will turn over any pertinent information beginning from the date of the initial screening of the case to the Department of Health to aid in the investigative effort. The Department of Health will then begin their necessary contacts and complete a Monitoring Assessment (contact tracing occurs 48 hours prior to last known exposure). Collected data will be added to the NYSCommCare system and "Isolation & Quarantine" orders will be disseminated to the appropriate individuals based on tracking efforts. When determined to be appropriate, the Department of Health will issue "Release from Isolation/Quarantine" orders to these same individuals.
